REPORT OF SCHOOL SUPERINTENDENT

To the School Board and Citizens of New Ipswich:

I respectfully submit my twenty-third annual report as Superintendent of Schools.

A year ago I called your attention to the increasing costs of public schools, and made the statements that money expended for sound education is not to be regarded as a burdensome cost but as a productive investment; that the greatest waste we can make is to spend too little on education; and that every community should plan its budget with a view to making its schools as effective as possible.

Today the greatest hindrance to effective schools is the lack of a sufficient number of well qualified teachers. Contrary to the supposition that the ending of the war and the cessation of war industries would release a great many teachers to resume their profession, it has resulted, rather, in the case of women teachers, in a demand to be released from teaching by many whose husbands are discharged from the service. It is true that more men teachers are available as a result of the demobilization, but the great majority of teachers are women.

280,000 teachers in the United States left the profession during the war because they could not live on the salaries they were receiving. Some 80,000 emergency teachers with inferior qualifications have come in; thousands of positions have been abolished; class rooms have been crowded; and there are still around 10,000 unfilled teaching positions. The number of people training to become teachers dropped 60% during the war period. The schools of the Nation are confronted with a most critical situation which can only be remedied by making the teaching profession more attractive to young people, and that means, primarily, higher salaries.

According to the latest compilation of annual average salaries by states, twenty-two of the forty-eight states were paying higher average salaries than New Hampshire. In other words country-wide average salaries are about the same as New Hampshire is paying. Our near neighbors to the South are paying from one-half to two-thirds as much again in salaries, and the average salary in New York State is nearly double that in New Hampshire. It is only natural that we should lose many of our best teachers.

Teacher Salaries in New Hampshire

A tabulation of salaries paid to **Elementary** teachers in New Hampshire this year shows that:

In the sixty-three small towns with less than 600 population the lowest salary paid is \$1000, but only sixteen towns are paying less than \$1200; eleven towns are paying from \$1400 to \$1500; the five towns of this Supervisory Union that fall in this population group (Francestown, Greenfield, Lyndeborough, Mason and Temple) are paying from \$1200 to \$1350.

The fifty-two towns in the population range from 600 to 1000, including New Ipswich, are paying from \$1000 to \$1850.

The twenty-nine towns with populations from 1000 to 1500, including Greenville, are paying from \$1100 to \$1900.

The twenty-six towns including Wilton in the population range from 1500 to 2500 are paying from \$1000 to \$2200 per year for elementary teachers.

Many of the smaller towns find it difficult to raise the money to pay higher salaries, but until the State Legislature appropriates more money for State Aid than it has done in the past there seems to be no other way to secure well qualified teachers, or indeed any teacher at all for some positions. Most teachers will take a position that involves a single grade or at most two grades rather than several grades which makes it

doubly hard to secure teachers for rural schools.

Teachers' salaries is the largest single item in the budget and our estimate is placed conservatively at \$6150. The remaining items under "Support of Schools" are the same as last year except transportation. The large increase in the number of children carried this year made it necessary to make a new contract for a larger bus (which has not yet arrived, however) and the estimate of cost of transportation for next year is \$2750.00, which is \$900.00 above last year's estimate.

There is no substantial change in any item under "Other Statutory Requirements." There is, however, a slight change in the "Expenses of Administration" to cover the District's payment into Teachers' Retirement Fund which is now required by law and amounts to 4% of the annual salary of each teacher belonging to the Retirement Association. No payment will be required on insurance next year. Cost of new equipment is estimated at \$200. The total amount required to meet the budget of \$19,299.00 is reduced by estimated income to the extent of \$1299. Income from State Aid is roughly estimated at \$500.00: the exact amount will not be known until shortly before the March meeting. If the amount is substantially different a correction can then be made in the stated assessment required which is \$18,000.00.

The medical inspection was conducted by Dr. Cayward and Mrs. Gilbert in the fall but no report of their findings is available because Mrs. Gilbert has not yet recovered from an accident which occurred shortly after the work was done.

Respectfully submitted,

VERNON S. AMES,
Superintendent of Schools.
